Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. *Claims 1-12* drawn to a secure token access distributed network system, classified in class **726/9**.
 - II. *Claims 13-24* drawn to an on-premises restaurant communication system, classified in class **705/5**.
 - III. *Claims 25-34* drawn to a casino gaming monitoring, classified in class **463/25**.
 - IV. *Claims 35-44* drawn to an entry access communication system, classified in class **455/39**.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP ' 806.05(c)). In the instant case, the combination as claimed does not require the particular of the subcombination as claimed because the secured token network system does not require the use of customer number or table identifier, monitor or track various game statistics, and/or tracks employee id number and door number. The subcombination has separate utility such as restaurant reservation, casino gaming control, and remote entry/access.

Art Unit: 2143

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey C. Pwu whose telephone number is 571-272-6798.
